FOR THE THREE MONTHS ENDED MARCH 31, 2020 and 2019  
(Unaudited – Expressed in Canadian Dollars)

### **1. NATURE OF AND CONTINUANCE OF OPERATIONS**

Ely Gold Royalties Inc. (the “Company” or “Ely Gold”) was incorporated under the *Business Corporations Act* (Alberta) on May 10, 1996. The Company was continued into British Columbia in 2002 where it is now domiciled and governed by the *Business Corporations Act* (British Columbia). The Company is listed on the TSX Venture Exchange (“TSX-V”) under the symbol “ELY” and on the OTCQB under the symbol “ELYGF”.

The Company is an exploration and development stage natural resource royalty company engaged in the evaluation, acquisition, exploration and development of natural resource projects and royalties. The Company is currently focused on purchasing royalties and selling its gold projects, with the potential to generate royalties, in the United States and Canada.

The Company’s registered office is Suite 2833 – 595 Burrard Street, P.O. Box 49195, Vancouver, British Columbia, Canada, V7X 1J1.

The recovery of the amounts comprising exploration and evaluation assets and royalty interests is dependent upon the confirmation of economically recoverable reserves, the ability of the Company to obtain necessary financing to successfully complete their exploration and development, upon future profitable production or disposition of its mineral interests.

These condensed interim consolidated financial statements have been prepared by management on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. For the three months ended March 31, 2020, the Company incurred a net loss of \$1,612,612 (2019 - \$296,762) and has incurred ongoing losses since incorporation. A number of alternatives, including, but not limited to, selling an interest in one or more of its properties or completing a financing, are being evaluated with the objective of funding ongoing activities and obtaining additional working capital. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future and repay its liabilities arising from normal business operations as they become due.

These condensed interim consolidated financial statements were approved by the Board of Directors for issue on May 28, 2020.

### **2. BASIS OF PREPARATION AND CONSOLIDATION**

These condensed interim consolidated financial statements, including comparatives, have been prepared in accordance with International Financial Reporting Standards (“IFRS”), as applicable to interim financial reports, including International Accounting Standard (“IAS”) 34 *Interim Financial Reporting*. Therefore, these condensed interim consolidated financial statements do not include all the information and note disclosures required by IFRS for annual financial statements and should be read in conjunction with the annual consolidated financial statements for the year ended December 31, 2019 (“Annual Financial Statements”), which have been prepared in accordance with IFRS.

The accounting policies applied in preparation of these condensed interim consolidated financial statements are the same as those applied in the most recent Annual Financial Statements and were consistently applied to all the periods presented with the exception of IFRS 16 *Leases* discussed below.

These condensed interim consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information. All dollar amounts presented are in Canadian dollars, the Company’s functional currency, unless otherwise specified.

FOR THE THREE MONTHS ENDED MARCH 31, 2020 and 2019

---

**2. BASIS OF PREPARATION AND CONSOLIDATION (cont'd...)**

These condensed interim consolidated financial statements incorporate the financial statements of the Company and its controlled subsidiaries. Control exists when the Company has the power, directly or indirectly, to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The Company's wholly owned subsidiaries include DHI Minerals Ltd. ("DHI") (a Canadian corporation), DHI Minerals (US) Ltd. ("DHI US") (a Nevada corporation), Voyageur Gold Inc. ("Voyageur") (a Canadian corporation) and Nevada Select Royalty, Inc. ("Nevada Select") (a Nevada corporation).

Where necessary, adjustments are made to the financial statements of subsidiaries to bring the accounting policies used in line with those used by the Company.

**Use of estimates and judgments**

The preparation of these condensed interim consolidated financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the condensed interim consolidated financial statements and the reported revenues and expenses during the period. Although management uses historical experience and its best knowledge of the amount, events or actions to form the basis for judgments and estimates, actual results may differ from these estimates.

*Critical Accounting Estimates*

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the financial position reporting date, which could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

*Recovery of deferred tax assets*

The Company estimates the expected manner and timing of the realization or settlement of the carrying value of its assets and liabilities and applies the tax rates that are enacted or substantively enacted on the estimated dates of realization or settlement.

*Share-based payments*

The fair value of share-based payments is subject to the Black-Scholes option pricing model that incorporates market data and involves uncertainty in estimates used by management in certain assumptions. As the Black-Scholes option pricing model requires the input of highly subjective assumptions, including the volatility of share prices and expected forfeiture rate, changes in subjective input assumptions can materially affect the fair value estimate.

---

**2. BASIS OF PREPARATION AND CONSOLIDATION (cont'd...)***Critical Accounting Estimates (cont'd...)**Impairment of mineral and royalty interests*

Assets or cash-generating units are evaluated at each reporting date to determine whether there are any indications of impairment. The Company considers both internal and external sources of information when making the assessment of whether there are indications of impairment for the Company's mineral and royalty interests.

In respect of costs incurred for its mineral properties, management has determined that exploratory drilling, evaluation and related costs incurred, which have been capitalized, continue to be appropriately recorded on the condensed interim consolidated statement of financial position at carrying value. Management uses several criteria in its assessments of economic recoverability and probability of future economic benefit, including geologic and metallurgic information, economic assessment/studies, accessible facilities and existing permits.

*Critical Accounting Judgments*

Management must make judgments given the various options available under IFRS for items included in the condensed interim consolidated financial statements. Judgments involve a degree of uncertainty and could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual events differ from a judgment made. Critical judgments have been made by management in arriving at the three above noted critical estimates.

**3. SIGNIFICANT ACCOUNTING POLICIES**

These condensed interim consolidated financial statements have been prepared on the basis of accounting policies and methods of computation consistent with those applied in the Company's audited Annual Financial Statements for the fiscal year ended December 31, 2019.

**4. FINANCIAL INSTRUMENTS**

The Company categorizes financial instruments measured at fair value at one of three levels according to the reliability of the inputs used to estimate fair values. The fair value of financial assets and financial liabilities included in Level 1 are determined by reference to quoted prices in active markets for identical assets and liabilities. Financial assets and liabilities in Level 2 are valued using inputs other than quoted prices for which all significant inputs are based on observable market data. Level 3 valuations are based on inputs that are not based on observable market data.

The carrying values of cash and cash equivalents and marketable securities have been based on quoted market prices, a Level 1 measurement according to the fair value hierarchy. The carrying values of accounts payable and accrued liabilities approximate fair values due to the short term to maturity of these financial instruments. The carrying value of note payable approximates fair value, as the note bears market interest rate.

**4. FINANCIAL INSTRUMENTS (cont'd...)**

The Company's risk exposure and the impact on the Company's financial instruments are summarized below.

**(a) Credit risk**

Credit risk refers to the potential that a counterparty to a financial instrument will fail to discharge its contractual obligations. The Company manages credit risk, in respect of cash and cash equivalents, by placing its cash balances at major Canadian and American financial institutions.

Concentration of credit risk exists with respect to the Company's cash and cash equivalents, as all amounts are held at major Canadian and American financial institutions. The Company's concentration of credit risk and maximum exposure thereto is as follows:

	March 31, 2020	December 31, 2019
Cash and cash equivalents	\$ 9,752,812	\$ 2,973,520
Receivables	150,072	122,309
	<u>\$ 9,902,884</u>	<u>\$ 3,095,829</u>

**(b) Liquidity risk**

Liquidity risk is the risk that the Company will encounter difficulty in satisfying financial obligations as they become due. The Company manages its liquidity risk by forecasting cash flows from operations and anticipated investing and financing activities. At March 31, 2020, the Company has cash and cash equivalents of \$9,752,812 (December 31, 2019 - \$2,973,520) and current liabilities of \$1,091,301 (December 31, 2019 - \$1,483,373).

The amounts listed below are the remaining contractual maturities for financial liabilities held by the Company:

Due Date	March 31, 2020	December 31, 2019
0 – 90 days	\$ 362,201	\$ 898,913
90 – 365 days	729,100	584,460
More than 1 year	6,321,699	1,295,499
	<u>\$ 7,413,000</u>	<u>\$ 2,778,872</u>

**(c) Market risk**

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices. Market risk comprises three types of risk: interest rate risk, foreign currency risk and equity price risk.

FOR THE THREE MONTHS ENDED MARCH 31, 2020 and 2019  
(Unaudited – Expressed in Canadian Dollars)

**4. FINANCIAL INSTRUMENTS (cont'd...)**

## (c) Market risk (cont'd...)

## (i) Interest rate risk

Interest rate risk consists of three components:

- (a) To the extent that payments made or received on the Company's monetary assets and liabilities are affected by changes in the prevailing market interest rates, the Company is exposed to interest rate cash flow risk.
- (b) To the extent that changes in prevailing market rates differ from the interest rate in the Company's monetary assets and liabilities, the Company is exposed to interest rate price risk.
- (c) Fluctuations in the interest rates impact the value of cash equivalents. As at March 31, 2020, the impact of interest rates on the Company is not deemed significant. The Company's other liabilities are not exposed to interest rate risk, as they are carried at amortized cost.

## (ii) Foreign currency risk

The Company incurs expenditures in Canada and the US. Foreign currency risk arises as the amount of the US dollar cash, intercompany balances and payables will vary in Canadian dollar terms due to changes in exchange rates.

As at March 31, 2020 and December 31, 2019, the Company has not hedged its exposure to currency fluctuations.

At March 31, 2020 and December 31, 2019, the Company is exposed to currency risk through the following assets and liabilities denominated in US dollars:

	March 31, 2020	December 31, 2019
Cash and cash equivalents	US \$ 5,469,289	US \$ 735,612
Accounts payable and accrued liabilities	(46,444)	(83,641)
Interest payable	-	(11,521)
Net	US \$ 5,422,845	US \$ 640,450
Canadian dollar equivalent	\$ 7,693,390	\$ 831,818

Based on the above net exposures as at March 31, 2020, a 5% change in the Canadian/US exchange rate would impact the Company's income (loss) and comprehensive income (loss) by approximately \$385,000 (December 31, 2019 - \$53,000).

FOR THE THREE MONTHS ENDED MARCH 31, 2020 and 2019  
(Unaudited – Expressed in Canadian Dollars)

**4. FINANCIAL INSTRUMENTS (cont'd...)**

## (d) Market risk (cont'd...)

## (iii) Equity price risk

Equity price risk is the uncertainty associated with the valuation of assets arising from changes in equity markets. The Company's marketable securities consisting of common shares are exposed to significant equity price risk due to the potentially volatile and speculative nature of the businesses in which the investments are held.

Based on the marketable securities held as at March 31, 2020, a 10% change in the market price of these securities would impact the Company's income (loss) and comprehensive income (loss) by approximately \$71,000 (December 31, 2019 - \$93,000).

## (iv) Fair value hierarchy

The following tables summarize the Company's financial instruments under the fair value hierarchy as at March 31, 2020 and December 31, 2019:

March 31, 2020	Level 1	Level 2	Level 3	Total
Cash and cash equivalents	\$ 9,752,812	\$ -	\$ -	\$ 9,752,812
Marketable securities	\$ 715,820	\$ -	\$ -	\$ 715,820

  

December 31, 2019	Level 1	Level 2	Level 3	Total
Cash and cash equivalents	\$ 2,973,520	\$ -	\$ -	\$ 2,973,520
Marketable securities	\$ 1,248,828	\$ -	\$ -	\$ 1,248,828

**5. CAPITAL MANAGEMENT**

The Company is an exploration stage company and this involves a high degree of risk. The Company has not determined whether its exploration and evaluation assets contain economically recoverable reserves of ore and currently has only earned revenues from option proceeds on its exploration and evaluation assets. The Company's primary source of funds comes from the issuance of share capital and debt. The Company does not use other sources of financing that require fixed payments of interest and principal due to lack of cash flow from current operations and is not subject to any externally imposed capital requirements.

The Company defines its capital as equity. Capital requirements are driven by the Company's exploration activities on its exploration and evaluation assets. To effectively manage the Company's capital requirements, the Company has a planning and budgeting process in place to ensure that adequate funds are available to meet its strategic goals. The Company monitors actual expenses to budget on all exploration projects and overhead to manage costs, commitments and exploration activities.

The Company has in the past invested its capital in liquid investments to obtain adequate returns. The investment decision is based on cash management to ensure working capital is available to meet the Company's short-term obligations while maximizing liquidity and returns of unused capital.

There have been no changes to the Company's approach to capital management during the three months ended March 31, 2020.
